

MUSIC STUDIO

Turn any MP3 or MP4 into perfectly-timed subtitles, karaoke videos, lyric sheets, and guitar tabs — in a few clicks.

One desktop app for creators, worship teams, guitar teachers, and karaoke hosts who need accurate lyrics, clean video captions, and playable tabs — without hiring an editor or transcriber.

What it does

AI-Powered Subtitles

Whisper large-v3 transcription with auto language detection produces frame-accurate .srt files, ready to edit in-app.

Karaoke Video Builder

Burns synced lyrics onto any image or video background and renders a finished, shareable karaoke video.

Vocal & Guitar Isolation

Demucs source separation strips vocals or isolates guitar for cleaner transcripts and instrumental tracks.

Guitar Solo Tab Export

Automatically generates a printable guitar tab (PDF) straight from the audio — no manual charting.

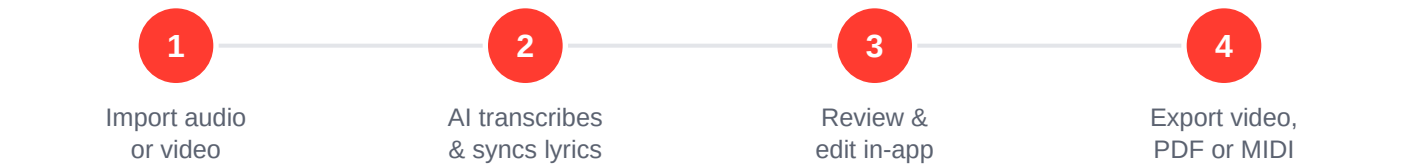

Full Song Transcription

One-click TAB + MIDI export captures the whole arrangement, not just the vocal line.

Lyrics Sheet Export

Clean, print-ready lyric sheets bundled with the MP3 — perfect for rehearsals and handouts.

How it works

Built for

- Content Creators
- Worship & Choir Teams
- Karaoke Hosts
- Guitar Teachers
- Video Editors

See it turn a song into a finished video — in minutes.

No subscription. No cloud upload. Everything processes on your own machine.
