Tip: start with 1. Generate Subtitles.
Karaoke, Lyric Video and Lyrics/Tabs
need the .srt it creates.

1. Generate Subtitles

[< Back to index](#)

Start here. Karaoke, Lyric Video and Lyrics/Tabs all need the .srt this creates. (Also: Browse SRT)

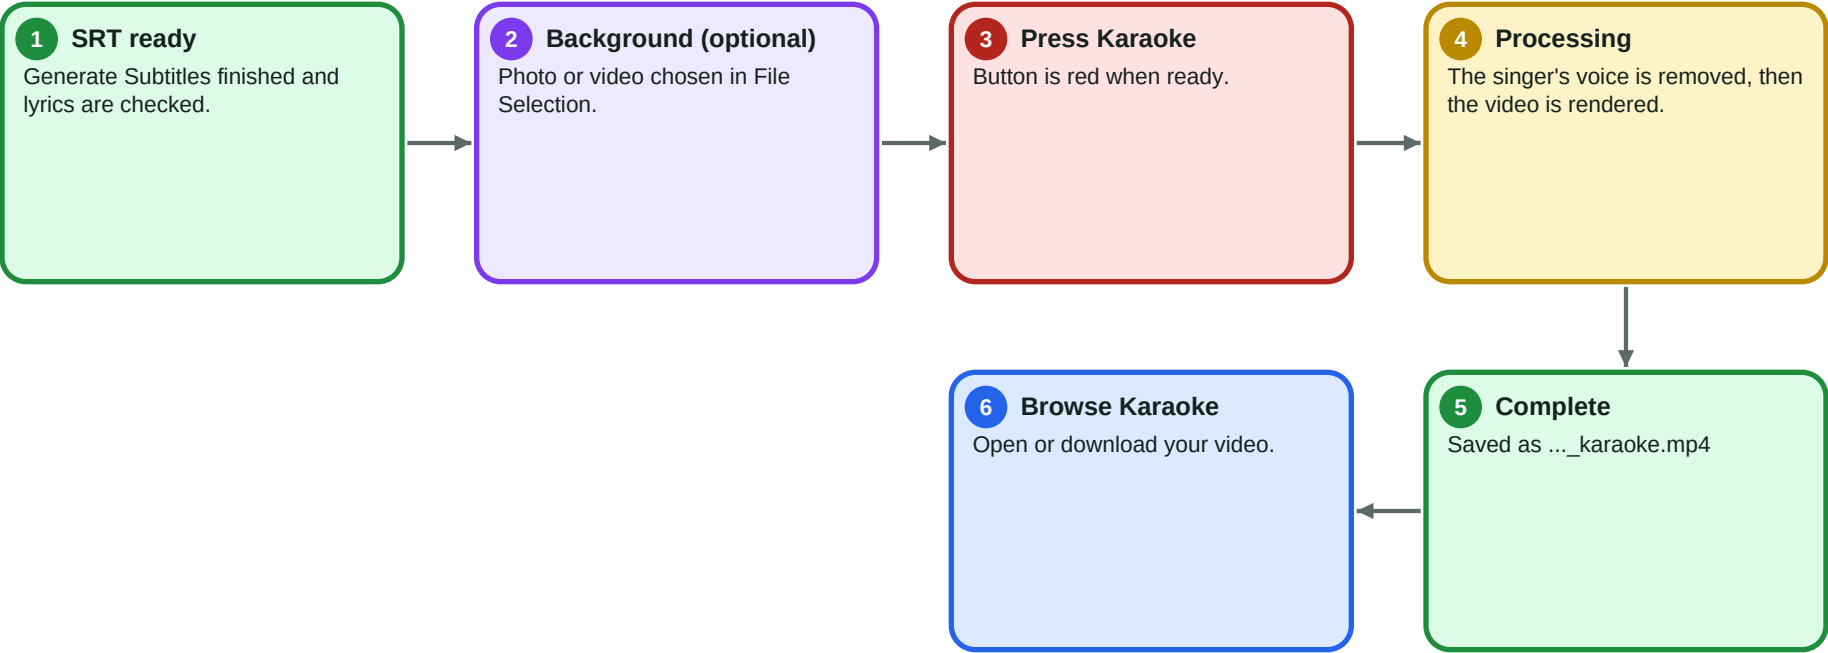

□ Your action □ Optional □ Press button (red) □ Working (yellow) □ Finished (green)

Press on a button to see how it works

2. Karaoke (music only, no singer)

< Back to index

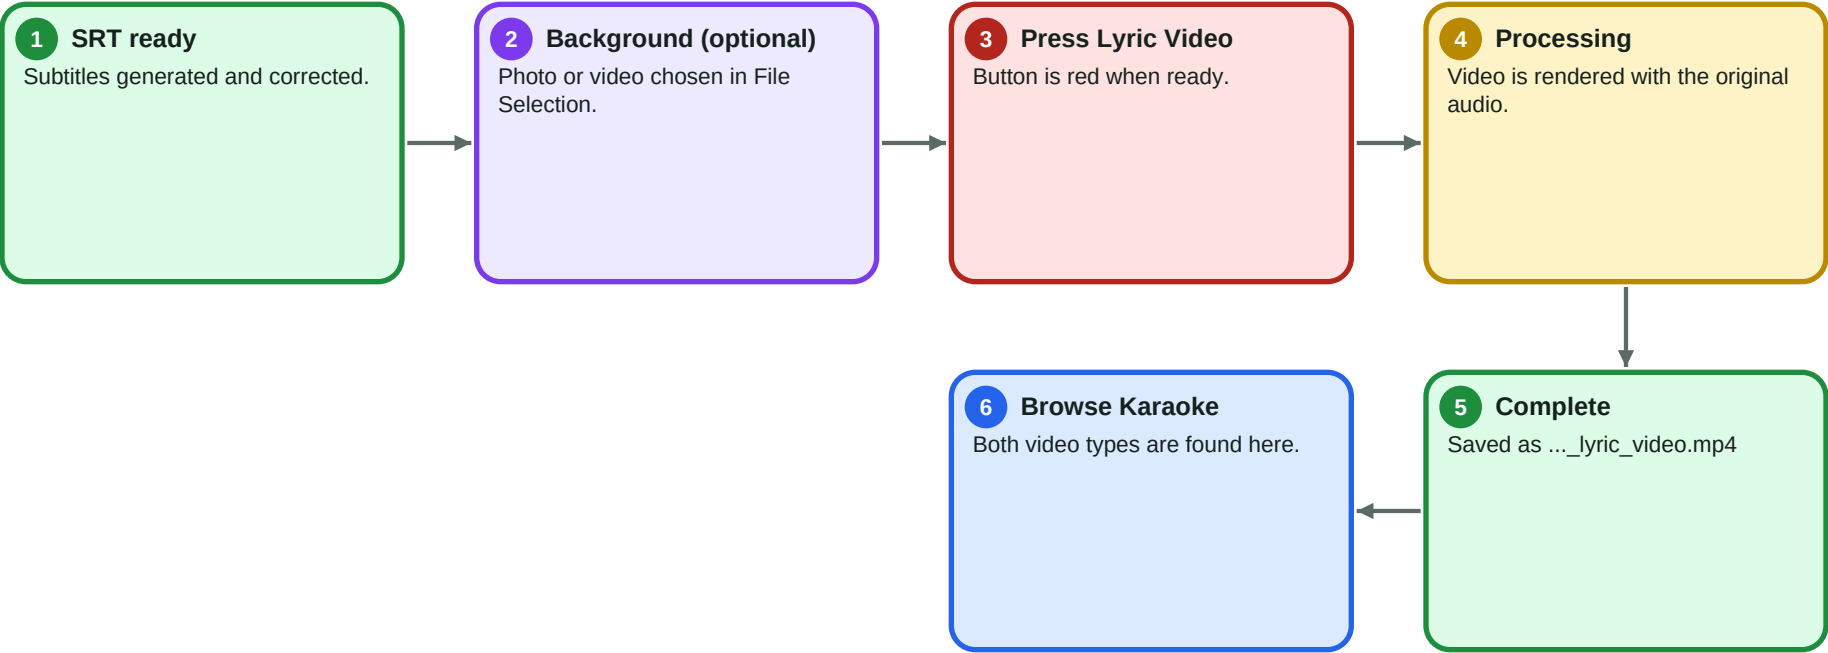

Needs the .srt from step 1. (Also: Browse Karaoke)

3. Lyric Video (original song with singer)

[< Back to index](#)

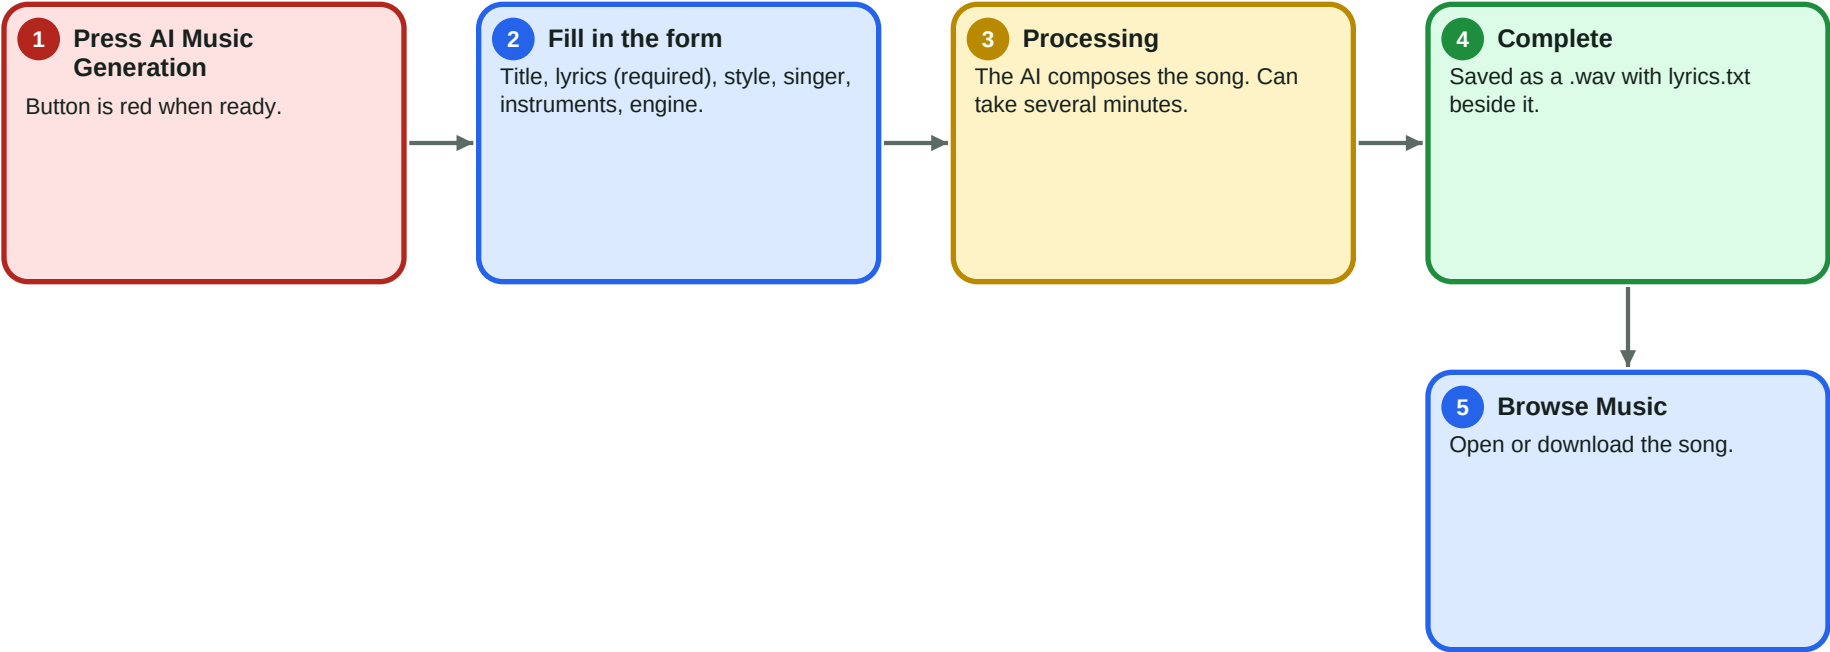

Same as Karaoke, but the vocals stay in. Needs the .srt from step 1.

4. AI Music Generation

[< Back to index](#)

Creates a brand-new song. No input file needed. (Also: Browse Music)

Your action

Optional

Press button (red)

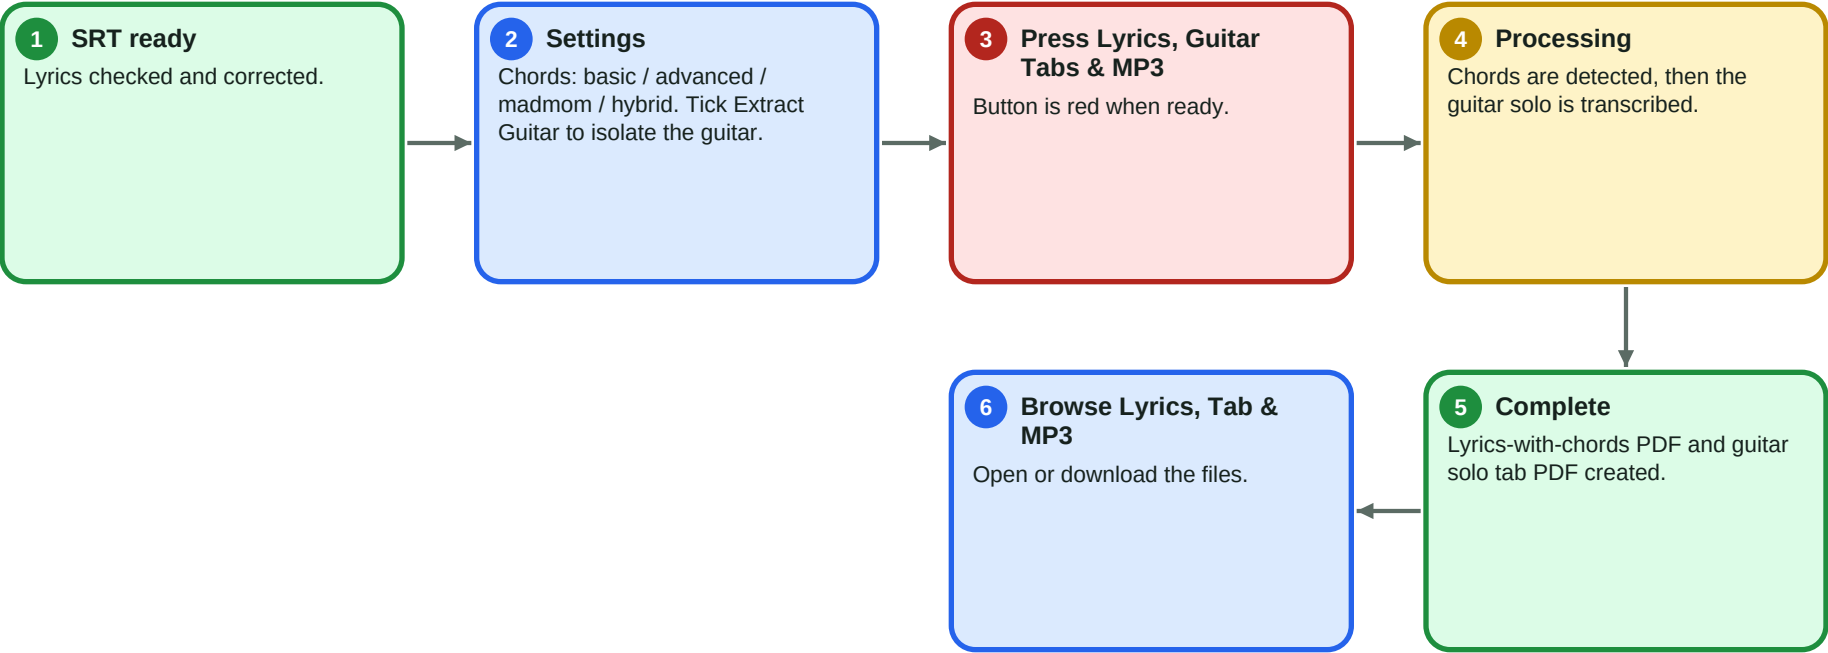

Working (yellow)

Finished (green)

5. Lyrics, Guitar Tabs & MP3

[< Back to index](#)

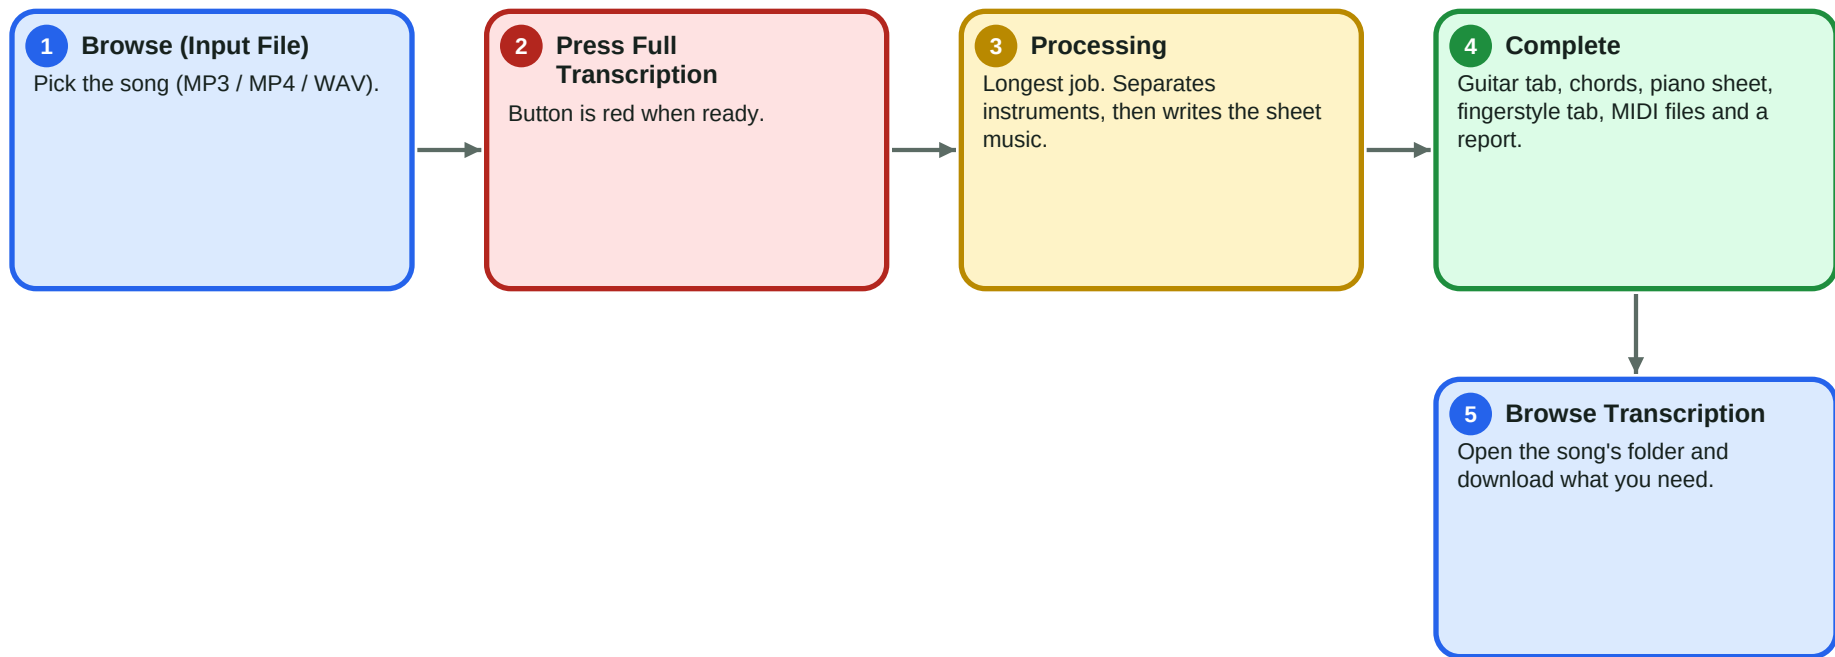

Needs the .srt from step 1. (Also: Browse Lyrics, Tab & MP3)

6. Full Transcription

[< Back to index](#)

Only needs the input file. No .srt required. (Also: [Browse Transcription](#))

 Your action

 Optional

 Press button (red)

 Working (yellow)

 Finished (green)

Press on a button to see how it works

7. File Selection, Settings, Stop & Clear

[< Back to index](#)

The controls that support every other button.

Your action

Optional

Press button (red)

Working (yellow)

Finished (green)

Press on a button to see how it works
